

PCM 32

Pure Phase Change Material
Phase Change: 32°C, 89.6°F

DESCRIPTION

Pure (or raw) Phase Change Materials (PCMs) are substances which can store and release large amounts of energy by undergoing a phase change between its liquid and solid states.

As the PCM cycles between the liquid and solid states it holds the temperature around its particular melt point. PCMs are unique in that they provide a completely passive thermal regulation system. Under the proper conditions, PCMs can cycle thousands of times. Microtek offers pure PCMs with melt points in the range of -30°C to 43°C. Custom temperatures are available.

APPLICATIONS

Pure PCMs are used to regulate temperatures by providing both cooling and heating effects, and for heat storage, in a variety of applications. Pure PCMs are widely used in application areas such as:

- **Thermal Energy Storage (TES)** – heat storage and release in conjunction with solar energy and HVAC systems.
- **Electronics** – for cooling electrical components in tablets, phones, laptops, data centers, and remoteaccess equipment such as telecommunication stations.

PACKAGING

This product is generally shipped in 1 gallon pails (6 lbs) or 55 gallon drums (330 lbs).

HEALTH AND SAFETY

Please refer to the Safety Data Sheet (SDS) for necessary safety and handling precautions for this product.

PROPERTIES

PCM 32 typically exhibits these general properties:

Typical Properties

Appearance	Above melt point: Liquid, colorless Below freeze point: Solid, opaque
Form	Bulk
Type	Paraffin
PCM Content	100%
Melting point	32°C, 89.6°F
Heat of fusion	180-190 J/g
Thermal Cycling	Multiple
